SWISSTEN

smartphone accessories

Welcome to the world of Swissten.

Swissten is a brand of smartphone accessories that finds inspiration in Swiss precision and emphasis on quality. Swissten came on the market in 2015 with a model series of travel chargers and car chargers, and from that point on, we are growing year by year. In the Swissten portfolio, there are now more than 1850 different products, and the number is still growing and not showing any signs of stopping.

We are a company specializing in smartphone accessories, with a strong presence in the market since 2015. The company has established itself as a reliable provider of high-quality accessories, offering a wide range of products designed to enhance the functionality and style of mobile devices. With a focus on innovation and customer satisfaction, Swissten has become a brand for consumers seeking durable and stylish accessories for their smartphones. Since its inception, Swissten has consistently delivered innovative and practical smartphone accessories to meet the evolving needs of consumers.

for LAPTOPS, TABLETS, SMARTPHONES

Gallium nitride, or GaN, is a material that's starting to be used for semiconductors in chargers. Less heat means components can be closer together, so a charger can be smaller than ever before—while maintaining all the power capabilities and safety standards.

TOUCH FRIENDLY

TEMPERED GLASS

case friendly

diamond strength

shock resistant

100% touch

DIAMOND ULTRA CLEAR

Raptor Tempered Glass offers a new level of transparency and color preservation without distortion.

EASY INSTALLATION

ESD is the best full adhesive coating that doesn't attract dust from the environment. Such coating facilitates and speeds up the installation process. It also reduces the likelihood of dust and other small elements between the glass and the display.

STRONGEST SHIELD

The screen is maximally protected on impact and scratches by the special tempered glass with its hardened and rounded edges. The glass is also protective-case friendly.

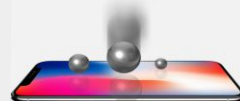

ANTI-FINGERPRINT

The surface treatment of the glass is carried out by the most modern equipment with two plasma streams. This ensures a high level of surface quality. This makes the surface pleasant to the touch, improves the scrolling of the fingers on the screen and reduces the visibility of fingerprints.

TESTED

drop ball test
scratch resistant test
adhesion test
antibacterial surface test
oleophobic coating test with liquid

- Antibacterial surface kills 99.9% of bacteria.
- Extreme hardened rounded edges.
- The silicone layer reduces the visibility of scratches on the used smartphone.
- Simple and quick installation without bubbles. Adhesion over the entire surface of the glass.
- Absolutely clear glass, doesn't distort colors or selfie photos.
- Improved oleophobic coating reduces fingerprint visibility and improves smartphone control.
- Ultra-thin glass that doesn't affect with the design of the smartphone.
- Full screen protection.

We reduce fuel consumption

We reduced the size of the packages by up to 70% and thanks to that we save a huge amount of fuel for the transport of goods.

50% of packages is used only one time

We believe that many customers choose this simple package which is environmentally friendly.

We reduce the consumption of plastics

We excluded any plastics from the packages.

We use recycled material

We use 100% recycled paper for package, inner filler and user manual.
